The real notes of planets are 5th harmonics of the occult/vedic notes of the planets.

The word occultist has been given a bad name by the idiotic conspiracy theorists out there.

All it really means is a group of people who search the truth away from the dogma of organized religions.

The occultists/vedics used these notes to correct the various chakras.

So this must mean that playing a 5th harmonic chord is what you need to do correct the in-balance in the chakra!

Quite fascinating that the occultist knew these relationships 1000s of years ago and that it has a perfect relationship with the actual true mathematical calculations of these notes.
